

**DigiMemo Bluetooth Transmitter for Smartphone
Sends e-Mail / MMS handwritten on paper**

Upgrade your DigiMemo L20 and use it with your Smartphone!

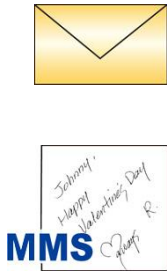

With the *Bluetooth* Transmitter, your DigiMemo can send your e-Mail / MMS written on paper or sticky note by Smartphone.

Keep and view your paper sticky notes as small pictures on your Smartphone, and send via e-Mail / MMS later.

- Simply plug the *Bluetooth* Transmitter into the digital pad and use its DigiMemo Express software for Smartphone to easily select, transfer and view your handwritten notes on the Smartphone.
- The Auto Capture function automatically captures only your handwriting area as a picture.
- The Frame Capture function allows you to easily select the handwritten area as a picture by moving a fixed frame.
- You can store or send your handwritten notes as JPG, PDF or DHW in the Smartphone.
- Portable and compact at only 0.017 lbs (7.6 g).
- The *Bluetooth* Transmitter used with the DigiMemo is also an excellent solution for paper form applications where the handwritten ink data can be immediately sent to the office by Smartphone.
- Works with Smartphone OS: Symbian S60 3rd Edition (3.x) / UIQ 3.x, or Windows Mobile 5 / 6.
